

2026 ASC REGION 2 ALTERNATE LEADERSHIP COMPETITION PROBLEM STATEMENT

Project Name: Lonesome Duff Substation- Civil

Overview:

A Texas Utility Company plans to construct a new substation to keep up with growing power demand in the area. The scope of work includes the civil construction scope of work for the substation: clearing, earthwork, aggregate installation, storm pipe, erosion controls, seeding and installation of foundations.

Bid documents including construction drawings, geotechnical report, specifications, etc. will be provided on 11/10/26.

Multiple heavy civil contractors will compete to be awarded the contract and perform this scope of work. The awarded contractor will be chosen based on the following deliverables:

- Cost Estimate (20%)
- Schedule (20%)
- Safety (20%)
- Presentation (40%)

Due Date: 11/10/26
